

Is Hodgdon propellant the same as ADI propellant?

ADI export a range of propellant to the US market where they are rebranded by Hodgdon Powder Company. We share reloading data and technical information with Hodgdon, which helps keep our products at the cutting edge of performance and quality, also the sizeable volumes of Aussie-made powder we export to the US help keep local manufacture economically viable.

ADI / Hodgdon Propellants Equivalents

ADI Powder	Hodgdon / IMR naming
